Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regard to claim 1, the "fill pipe" is inferentially included as part of the claimed combination of elements rendering the claims indefinite as to whether the combination of a cover assembly and fill pipe or subcombination of a cover assembly is intended to be claimed. Should applicant intend the "fill pipe" to be a positive element of the claimed combination, then structural antecedent basis should be provided therefor. If not, the terminology "adapted to be" could be used (i.e., the mounting member is adapted to be mounted on and receiving...).

Claim Objections

Claim 2 is objected to because of the following informalities: On line 2, "filler" should be - - fill - -. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3751

Claims 1, 2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Barras.

In regard to claim 1, the Barras reference discloses a fuel tank cover assembly (see Figure 3) comprising a "mounting member" 70 having a "first lockable part" 56, a "cover member" 32 having a "second lockable part" 34 that are secured together by a "lock" 60, as claimed.

In regard to claim 2, a "funnel member" 16 is attached to "mounting member" 70 via screws 86.

In regard to claim 4, the "mounting member" 70 is a hollow annular body having "tabs" (72 and 74) to connect to the fill tube via screw 76.

Claims 7, 8 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Barras.

In regard to claim 7, the Barras reference can be interpreted as comprising a "first stub" 46 and "second stub" 56 on "mounting member" (16 and 70) and "cover member" 32 comprising a "first tab" 36 and "second tab" 34, as claimed.

In regard to claim 8, "second tab" 34 has an "opening" (unlabeled, see Fig. 6) to accept "second stub" 56 having an "opening" (unlabeled to accept pin 58).

In regard to claim 11, the "mounting member" (16 and 70) is a hollow annular body having "tabs" (72 and 74) to connect to the fill tube via screw 76.

Allowable Subject Matter

Claims 3, 5, 6, 9, 10, 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Folz reference pertains to a fuel tank cover, similar to Applicant's device.
